BUSINESS ANALYST

TechnoLogica delivers IT solutions, products and services focused on enterprise digital transformation and e-government. Our team consists of skilled and experienced individuals dedicated to developing solutions and products that ensure success for our customers.

Due to the expansion of our Business Process Analysis Team,
we are looking for: **BUSINESS ANALYST**

REQUIREMENTS:

- Bachelor or higher degree in business administration, economics, computer science or other relevant;
- Some experience in projects related to business analysis, business process mapping or IT system requirements definition;
- Customer-relationship building attitude and good communication skills;
- Good command of English language;
- Willingness for expansion of skills through continuous learning.

ADVANTAGES:

- Experience with a process modelling tool, e.g. ARIS;
- Interest in project management and IT systems.

RESPONSIBILITIES:

- Model and analyse customer business processes to get a clear picture how activities are performed;
- Formulate how business processes can be improved, work closely with customers from the public or private sector;
- Gather and map business and IT requirements to identify the needs of various stakeholders;
- Conduct customer trainings or workshops to share knowledge and discuss business needs;
- Prepare business process documentation.

WE OFFER:

- Dynamic work environment in a steadily growing and stable company, known for its sustainable culture and values;
- A chance to work in a team of professionals with extensive expertise in various fields;
- On-job training and self-study learning paths;
- Competitive remuneration package;
- Social benefits, corporate events and special interest groups;
- Friendly atmosphere and a team where everyone matters.
