MAIN RESPONSIBILITIES:

- Development related activities in project or product oriented teams;
- Implementing best practices to create well designed, documented, efficient and testable code;
- Contribution to all phases of software development life cycle;
- Communicating and resolving technical and functional issues;
- Knowledge sharing and excellent collaboration with team members and customers.

REQUIREMENTS:

- Excellent knowledge of SQL, PL/SQL;
- Experience in development of information systems with ORACLE technologies;
- Good analytical and communication skills;
- Very good teamwork skills;
- Experience with version control systems;
- Willingness for personal and professional development.

AS AN ADVANTAGE, WE CONSIDER:

- Competences in business analysis or UML;
- Competences in database design;
- Knowledge or experience in Oracle APEX, XML, JSON, Angular;
- Professional certificates;
- Good command of English language.

BENEFITS:

- Sustainable company with long-term commitments;
- Friendly, vibrant and intellectually challenging workplace;
- Opportunities for professional training, growth and certification;
- Opportunities to build software products and critical information systems from scratch using modern technologies;
- Diversity of projects and possible mobility between projects over time;
- Competitive remuneration package base on individual performance;
- Referral program – we value talent and we facilitate a friendly working atmosphere, bring your friends!
- Social benefits, corporate parties and special interest groups.
